FRANKE

MAKE IT WONDERFUL WITH FRANKE

Franke makes traditional, top-quality and down-to-earth products that accompany us in our daily lives. Our brand promise to you is; whether you are business partner or an end user, we make your everyday life a little less ordinary. As our products are subject to high usage and daily wear and tear so we strive to make these everyday objects durable, reliable and beautiful. That's what 'Make it Wonderful' stands for.

Our education portfolio covers nurseries right through to universities and encompasses products suitable for the washroom, student accommodation, commercial catering and cleaning facilities. We also provide a bespoke service for those specialist projects.

FROM NURSERY TO UNIVERSITY...

WASHINO MAKES WASHING HANDS FUN!

The playful wave and pleasant warm surface of the MIRANIT troughs are a temptation for children to wash their hands.

The larger outer radii of the mineral granite made basins reduce the risk of injury, while the generous inner radii and their seamless design make cleaning the washtroughs an easy task.

The non-porous, high gloss hygienic surface in conjunction with a high resistance to impact and abrasion, emphasises how well these wash and play troughs are suitable for everyday use.

All models are supplied with a standpipe waste as well as a taphole for each wash place. Integrated basin back panel and mounting material make fitting easy.

CASE STUDY

POPLAR PRIMARY SCHOOL CHOOSSES FRANKE WASH AND PLAY TROUGHS

Franke Sissons' Miranit Washtroughs have been chosen by Poplar Primary School in Merton, London as part of the schools recent washroom refit.

In total, the children of the award winning primary school will enjoy seven 2 and 3 person wash and play Washino troughs made of Miranit, Franke Sissons' own granite composite mineral material. Specified in Alpine White, Miranit is completely smooth and pore free making it very easy to clean and resistant to bacteria, soap scum and lime scale build up. The perfect material for high-traffic environments like schools, the Washino basins are wave-shaped which allows greater accessibility thanks to a reduced projection.

The Washino wash and play troughs are part of a comprehensive and recently extended schools offering from Franke which includes every kind of product for a washroom new build or refurbishment project.

Victoria Himsworth, Product Marketing Manager for Franke Sissons, "The Washino is a very popular solution for settings with very young children. Not only is the design safe and hygienic it adds an element of fun to encourage children to wash their hands more often."

WHY USE STAINLESS STEEL?

- Robust and easy to maintain
- Resistant to moisture
- Scratches and grooves lose their sharp edges quickly and blend into the surface
- Can last for the lifetime of the building
- Our stainless steel accessories come in a number of finishes including satin and high polished
- Our range of accessories come with InoxPlus surface treatment for the reduction of fingerprints and dirt
- Stainless steel is fully recyclable and made from up to 80% recycled materials

TOILETS

It's recommended that toilets in a school should be wall hung to avoid dirt and germ build up around the floor junction – lifting the pan off the floor allows for more effective cleaning. The main benefits of stainless steel are in its hygienic and easy to clean surface and it's also much more resilient to vandalism than ceramic.

Stainless steel is also 100% recyclable and can be made to look contemporary with the use of coloured seats and modern accessories.

Our toilets use only 4 litres of water for each flush and are certified to EN997, generating additional BREEAM points. They are also approved on the government's water Technology List.

URINALS

- Available in single pods or larger urinal troughs
- A divider is also available if required to retain the privacy of each pupil where a cubicle may not be possible.

THE SATURN WASHTROUGH

Our wall mounted Saturn washtrough is a popular product for schools. Available with or without splashback and either self-closing or electronic taps. Electronic taps come with the added benefit of an automatic shut off when actuated continuously, reducing the potential for vandalism by flooding of the toilets.

Manufactured from 1.2mm grade 304 stainless steel, our washtroughs are durable and long lasting. Available for 2, 3 or 4 users in 1200mm, 1800mm and 2400mm lengths. Bespoke lengths can be supplied to suit your requirements.

Ask about our CPD on using stainless steel in the commercial washroom

THE STAINLESS STEEL WASHROOM

THE CIRCULAR WASHTROUGH

Where space is a constraint, our circular and semi-circular washtroughs provide an ideal solution. Suitable for up to 4 users for the semi-circular version and up to 8 users for the circular version, these washtroughs are highly durable to withstand intensive use in busy environments. Manufactured from a high grade 304 stainless steel and the best quality fittings, they offer additional benefits over the use of conventional washbasins.

- Single water supply and waste offer significant water and cost savings over single washbasins that require a water supply and waste for each basin
- Delivered fully assembled therefore saves time on installation
- Services are fed from below and can be accessed through a side panel, fitted with tamper proof security screws
- Choice of self-closing or touch free taps
- Also available in junior heights

All taps on our washtroughs are WRAS approved and some feature on the government's Water Technology List. They also score highly in the BREEAM rating for low water usage.

CASE STUDY

HENRY FANSHAWE SCHOOL, DRONFIELD CHOOSE FRANKE SISSONS FOR WASHROOM UPGRADE

When the Henry Fanshawe School in Dronfield thought about updating their washrooms over the summer break last year, local company Franke Sissons were the first company to spring to mind. Well known in the area due to its 231 year heritage, Franke Sissons were chosen to supply a mixture of products from their composite and stainless steel sanitary ranges.

Premises Manager, Keith Pattinson explains "We wanted to upgrade our washroom facilities with a robust but stylish washroom provision so we decided on a combination of a stainless steel and Miranit. The circular washtrough was delivered fully assembled which saved us time during installation and the Miranit composite trough looks fantastic in its surroundings. In the unlikely event of any after fit issues, with Franke we know we will be well cared for".

Miranit washtroughs are manufactured from a granite composite material in a single mould without seams or joints. This, in addition to the core being surrounded by a high gloss gelcoat layer, protects the trough from dirt and limescale build up, making them particularly suitable for use in schools. Available for 2, 3, or 4 users in lengths of 1200mm, 1800mm and 2400mm lengths with water saving self-closing or electronic taps, troughs are available from stock or within a short timeframe for larger projects.

STANDARD MIRANIT WASHBASINS AND WASHTROUGHS

Miranit is a stable compound consisting of approximately 80% natural minerals such as marble, sandstone and quartz sand as well as approximately 20% high quality unsaturated polyester resin. Quartz is one of the hardest materials and constitutes a large part of the earth's crust. The final product is highly stable and in combination with the unsaturated polyester resin and has very good forming characteristics to facilitate easy production into cast moulds.

Cast in a single mould without adhesive seams or joints Miranit offers an elegant appearance and highly durable finish. The smooth, pore free, and easy to clean gelcoat surface is extremely hardwearing and will continue to impress for years to come.

We have a standard 'off the shelf' range or bespoke options to meet your specific requirements.

CARDIFF & VALE COLLEGE CHOOSE FRANKE FOR NEW WASHROOMS

Recognised as one of the most ambitious educational projects in Wales, the Cardiff and Vale College's (CAVC) new campus opens its doors in September 2015. Franke Sissons were chosen to supply the elegant washroom units, with Miranit washtroughs and mixer taps.

The £45m development, in the heart of the Central Cardiff Enterprise Zone, has been carefully designed to attract companies in the financial and professional services sector with interior design and specification of products reflecting its dual use.

Working with both Willis Systems and local contractor CMB Engineering, the specification team designed and manufactured a bespoke washroom solution that will withstand the high traffic yet remain elegant and professional for the corporate sector visitors for years to come.

Tom Borley, Site Supervisor with CMB Engineering explains "We carefully brought together the specialist skills of Franke and Willis Systems to create a robust and stylish washroom provision. Franke's Miranit washtroughs are manufactured using a unique granite composite material that is non porous, resistant to heat, scratching and repels bacteria and lime scale build up. With Franke we know we can be confident our end customer, the college, will be well cared for."

BESPOKE MIRANIT WASHBASINS

Our bespoke range of washbasins can be custom made to suit any application and are perfect for schools, colleges and universities.

Three different bowl shapes can be seamlessly moulded into a strikingly graceful washbasin top with a material thickness of just 25mm and up to 3.6m in length. There is almost no limit to the variation of ideas; flexible washbasin length, a choice of bowl shapes, number of bowls and bowl spacing. The different designs with or without tap landing also provide the opportunity to include a wide range of fittings to obtain the chosen result. You can even choose from two different materials.

THE CHOICE IS YOURS

SOLID MATTE MATERIAL

Made from 2/3 aluminium hydroxide (ATH) and 1/3 polyester resin and the same colour all the way through, the matte material offers a high level of scratch resistance.

- Easy to repair, easy to clean, durable, fracture proof and scratch proof
- High stability with low material thickness
- Material coloured all the way through

WHITE WITH GELCOAT SURFACE

Made from 80% natural minerals and approximately 20% high quality unsaturated polyester resin. The core is surrounded by a pore free smooth high gloss Gelcoat layer.

- Hygienic surface finish which is temperature resistant up to 80°C
- High gloss Gelcoat layer
- Easy to repair and clean
- Durable and fracture proof
- High stability with low material thickness

OTHER OPTIONS TO CONSIDER

- Number of bowls
- Distance between bowls
- Length of washbasin
- Depth of washbasin
- With or without raised back edge
- Apron height
- With or without tapholes

INCORPORATE ANY ACCESSORIES

- Soap dispenser
- Towel holder
- Paper towel dispenser
- Waste disposal barrel
- Waste disposal flap

Our RIBA approved CPD 'A new generation of commercial washbasins and washtroughs' will help you understand the benefits of specifying this material.

Not all choices of bowl shape are available in every style of washbasin.

INTEGRATED ACCESSORIES

Complete the washroom with modern practical accessories including: soap dispensers, hand dryers, paper towel dispensers, towel rails and toilet roll holders amongst many others. The hygienic properties of stainless steel make it easy to clean and maintain whilst the contemporary appearance complements any style of washroom. With four distinct ranges and matching hand dryers, there is an option for any style and budget.

RODAN

The timeless design of RODAN stainless steel fixtures with their angular side profiles lends itself to the contemporary decor of heavily frequented washrooms.

STRATOS

The unique curved front cover defines the STRATOS range of products along with the InoxPlus surface treatment on the front cover reduces the appearance of dirt and fingerprints, making them exceptionally easy to clean.

XINOX

With its curved edges and distinctive shadow gap, the XINOX range is particularly stylish and has the added benefit of having the InoxPlus surface treatment on all surfaces. This reduces the appearance of dirt and fingerprints, making them exceptionally easy to clean.

EXOS

EXOS is the latest range from Franke and is the ultimate in high design with interchangeable fronts made of high quality InoxPlus coated stainless steel or toughened safety glass in Black or White.

FAST DRYING ENERGY EFFICIENT HAND DRYERS

Our range of touch free hand dryers use the latest technology that dries hands in record time and are available both in 'hands in' and 'hands under' options with different finishes.

AIRBLAST HAND DRYER

- Ideal for retro-fit as larger body covers screw holes
- Internal switch enables a choice of cool air at 550W or warm air at 1400W
- Unique blue LED light when in use
- Available in 4 different colours; white, black, polished or satin stainless steel

ECO-AIRBLAST MIDI PLUS

- Dries hands quickly in approximately 8-14 seconds
- Energy efficient at only 1250W or 550W
- Low cost to run of only £19 a year for 550W or £32 a year for 1250W
- Built in ioniser purifies the air

DRYX500

- High speed 'hands-in' hand dryer for wall mounting.
- Drying time 7-10 seconds, adjustable air speed, optional warm or cold air.
- Auto shutdown after 25 seconds. 1250 -1650W
- Water catchments and system to prevent water dripping onto the floor

THE FINISHING TOUCH

ADDITIONAL PRODUCTS...

TAPS

Fittings for washbasins and washtroughs are becoming ever more sophisticated when it comes to water saving, ease of installation and operation. The use of robust materials, reliable tried and tested technology and surface finishes make our range of taps particularly suitable for intensive public use. They also look good and are packed with added features. Our range of self closing and electronic taps save water and therefore, money. Available in a number of different styles and for different applications, i.e. wall or deck mounted.

CASE STUDY

BRENTSIDE HIGH SCHOOL LATEST SCHOOL TO CHOOSE MIRANIT

Brentside High School, Hanwell, London has been fitted out with stunning Miranit washtroughs during a recent refit of washrooms at the specialist Arts School in Ealing.

Working together with Franke Sissons' specifying customer Focus Washrooms, the team identified the Miranit trough solution as a hygienic non-porous solution for the hardwearing environment of a school washroom.

Kevin Dunham, of Focus Washrooms explains "Franke's Miranit provided a fantastic solution for this project. Utilising the popular trough basin concept, we were able to integrate Miranit troughs with our S3:60 solid grade laminate vanity panelling to create an efficient hand wash solution ideally suited to the education washroom environment. Franke supplied from stock and cut the tap holes to our specification. When compared to 3 individual basins, the ease of installation and a single waste outlet facilitate on site efficiencies."

DRINKING FOUNTAINS

Our range of stainless steel drinking fountains are available floor standing or wall hung and therefore suitable for children or young adults of any age. Available with bottle filler, they encourage the drinking of water throughout the day. Easy to install and low maintenance, they offer a reliable solution.

Our chilled variant includes an easy to open front panel and connects simply to the mains water supply. A chlorine based water filter and installation kit are supplied as standard and a BREEAM kit can be ordered if required.

The Department of Education now include clear advice on the standards for school premises and state that suitable drinking water facilities must be provided. Tanked supplies can be difficult to maintain in good condition, and so it is generally preferable if drinking water supplies in schools can be connected directly to the main water supply.

For student accommodation...

Our range of sinks and worktops are ideal for use in student accommodation. We have provided a unique on-site welding, polishing and installation service at Warwick University as part of their ongoing campus refurbishment for over 5 years!

For the classroom...

For the science classroom, our range of sinks manufactured from grade 316 stainless steel which makes them highly resistant to corrosion and most acids are suitable for this specific need. Available in a range of sizes and options.

For cleaning...

Some of our most popular products for schools are in our cleaning and janitorial range. From floor standing and wall hung cleaning sinks to a full janitorial unit.

OUTSIDE THE WASHROOM

CANTEENS, STAFF ROOM AND OTHER COMMUNAL AREAS

For anywhere that requires a washing facility, we have a solution. Our comprehensive range of washbasins in all sizes and shapes are suitable for any washing area; inset, undermounted and wall mounted options.

For canteens and catering facilities we have a full range of catering sinks, worktops, preparation tables and sink fitting food waste disposal units. See our website www.franke.com for more details.

We have a sales representative dedicated to your specific region, giving you the opportunity to discuss your project requirements face to face.

CASE STUDY

SIR JOHN CASS HALL STUDENT ACCOMMODATION

One of the UK's leading furniture manufacturers, JT Ellis, Huddersfield chose Franke Sissons, (also known as Franke Water Systems), to work in partnership recently to supply 12 bespoke kitchens for Sir John Cass Hall, a newly refurbished purpose-built, two-storey student accommodation.

Sir John Cass Hall, located in Well Street Hackney, London is part of Cass and Claredale Halls of Residence Association Limited, a not-for-profit organisation providing comfortable and secure accommodation for students studying in London.

For the worktops and sinks which take the majority of the impact in a multi-user kitchen, a material was needed that would truly stand up to the job. Using high grade, made to measure stainless steel products from Franke Sissons proved a compelling solution. Not only will its look and feel actually improve with use and age, it's virtually indestructible also.

Franke's kitchen worktops are templated, manufactured and welded to suit any commercial kitchen design and form part of the portfolio of high quality kitchen, catering and washroom products in stainless steel. All products carry CE marking as required.
