SPECIFICATIONS

BROEN-LAB CLEANLINE laboratory tapping points incorporate the functions shut-off, pressure regulation and pressure indication in one compact, ergonomic unit.

BROEN-LAB CLEANLINE valves for 6.0 clean gases can be used for non-corrosive (brass models) as well as corrosive (Stainless Steel models) gases and gas mixtures.

- The pressure regulator is diaphragm sensed for outlet pressures up to 10 bar and piston sensed for higher outlet pressure values.
- The acetone resistant pressure gauge is safely integrated into the adjusting handwheel to create an extremely compact device.
- Integrated shut-off valve in the rear-wall connector allows the preparation of the tapping point without pressure regulator.
- Quick and easy mounting or disassembly of the regulating unit with filled gas piping.
- Diaphragm shut-off valve with position indicator.
- Optional flow control / shut-off valve in the outlet.
- All gas-wetted components have undergone the special cleaning process and have been thoroughly baked out.
- All equipment has been 100%-helium-leak-tested using a mass-spectrometer.
- All components are plastic-covered resistant to acid and alkaline solutions.

TECHNICAL INFORMATION

Materials:

- Body: Brass (2503...-models)
Stainless Steel 1.4404 (316L) (2504...-models)
- Diaphragms: Hastelloy C276
- Other gas-wetted surfaces: Brass or SS 1.4404 (316L)
- Valve cone: SS 1.4404 (316L)
- Valve seat: PTFE / PVDF
- Cover: Polypropylene GB30

Leak rate (to atmosphere): 10^{-8} mbar l/s [He]

Filter: Brass: 100 μ m (bronze)
Stainless Steel: 150 μ m

Pressure ranges:

Inlet pres. P_1 :

P_2 up to 10 bar: max. 40 bar

$P_2 > 10$ bar: max. 100 bar

Max. outlet pressure P_2 :

1,0 / 1,5 / 2,5 / 5 / 10 / 16 / 25 / 65 bar

P_2 up to 10 bar: The pressure setting will be done at 10 bar inlet pressure. The limitation of the outlet pressure setting is approx. $P_2 + 5\%$.

$P_2 > 10$ bar: The inlet pressure for the pressure setting will be done according to the customer's / user's specification.

Flow rates with valve in the outlet: see flow curves

Connection to rear-wall connector: G 3/8" RH

For further information please contact your local BROEN-LAB representative.

Item	Designation	Function
1	Rotary lever	Used to actuate the shut-of valve
2	Hand wheel	Used for setting the outlet pressure
3	Pressure gauge	Indicates the current outlet pressure
4	Gas type label	Shows the type of gas the tapping points may be used for according to norm
5	Gas outlet	It is recommended to order the regulator with outlet connection from factory
6	Open/closed display	Shows the position of the shut-off valve
7	Pressure regulator	Diminishes the inlet pressure P_1 to the adjusted outlet pressure P_2
8	Union nut	Fastens the tapping points to the rear wall connection
9	Integrated shut-off valve	Seals the piping system as long as no tapping point is istalled and is used as the primary pressure shut-off valve for installed tapping points for installation instruction, please see next page.
10	Rear wall connection	Used as the connection point for the gas supply system
11	Fastening screws	Self-tapping screws for fastening the rear wall connection to the furniture wall
12	Half-shells	Used to cover the union nut

Rear wall connection assembly

Rear wall connection 1/4" NPT female and M24x1 male assembly from the front/fixing from the front with screws.

- Arrange the furniture wall as depicted in the drilling template
- Screw in self-tapping screws and fasten the rear wall connection to the furniture wall

Rear wall connection 1/4" NPT female and M24x1 male assembly from the front/fixing from behind with nut.

- Arrange the furniture wall as depicted in the drilling template
- Screw on M24x1 nuts and fasten the rear wall connection to the furniture wall

Rear wall connection with adapter plate

- Arrange the furniture wall as depicted in the drilling template
- Fasten the adapter plate to the furniture wall using the supplied self-tapping screws
- Fasten the rear wall connection to the adapter plate using the supplied M5x8 countersunk screws

TECHNICAL INFORMATION

TECHNICAL INFORMATION - INSTALLATION

Assembling and screwing together the rear wall connection and tapping point

Special attention is needed when assembling the rear wall connection and the actual tapping point (this equally applies to the column-mounted and the ceiling connection).

Both connecting parts have a hexagonal geometry that serves to aid positioning and acts as an anti-twist lock. It is very important that both hexagonal geometries are threaded in the correct position when manually screwing on the SW20 union nut. While doing this, **no force may be applied**, for example, by using a tool.

A tool may only be used for the final tightening of the union nut when both parts of the anti-twist lock are interlocked - you feel a "click" when it happens.

Otherwise, the tapping point will be incorrectly positioned and the rear wall connection will be damaged. As a result of this, gas-tightness will not be achieved in the connection between the rear wall connection and tapping points.

Note!

The hexagonal anti-twist lock can only be repositioned in 60° increments in accordance with its geometric proportions.

If the tapping point is to be rotated by 90° relative to its current position, the rear wall connection must first be rotated by 90°.

SURFACE MOUNTED FITTING, REAR OUTLET, INLET FEMALE 1/4"NPT

SPECIFICATIONS

Pressure regulator with integrated shut-off valve for installation into panels independent of the panel thickness. The rear outlet leads back into the panel.

Inlet connection: female 1/4"NPT
(see ordering information for other options)

Outlet connection: female 1/4"NPT
(see ordering information for other options)

FRONT CONTROL VALVES

Brass model

Stainless Steel model

SPECIFICATIONS

Valve can be used for non-corrosive and inactive gases with purity coefficient up to 6.0 (99.9999% pure gases).

Handle: Metal, BROEN-LAB Polyester Based Surface Treatment powder coated with media indication according to EN13792.

Headwork: Diaphragm type

Opening/closing function: 1.5 x 360°

Max. working pressure: 21 bar / 305 psi

Test pressure: 1.5 x working pressure

Inlet/outlet: Female 1/4" NPT thread

Leak rate: < 10⁻⁷ mbar x l/s [Helium]

Weight: 0.7 kg

MATERIALS WITH MEDIA CONTACT

Metals: Brass

Plastics: PVDF

Diaphragm: Stainless Steel Alloy

FUME HOOD OUTLETS

SPECIFICATIONS

BROEN-LAB CLEANLINE outlets for 6.0 gases can be used for mounting in the fume hoods in combination with BROEN-LAB CLEANLINE fittings with rear outlet connections.

Inlet connection: female 1/4"NPT - male 1/2"NPT (see ordering information for other options)

Outlet connection: female 1/4" NPT (see ordering information for other options)

Leak rate: < 10⁻⁷ mbar x l/s [He]

Weight: 0.5 kg

MATERIALS WITH MEDIA CONTACT

Metals: Brass or Stainless Steel

HOSE LENGTHS

Definition of length (L)

****Standard lengths of hoses (L):**

0500 = 500mm

0700 = 700mm

1000 = 1000mm

1200 = 1200mm

1500 = 1500mm

2000 = 2000mm

2500 = 2500mm

3000 = 3000mm

Length tolerance of hoses:
L = ≤400mm (- 0, +10mm)
L = 401mm to 1000mm (- 0, + 20mm)
L = >1000mm (- 0, + 30mm)

SPECIFICATIONS

Inner hose material:

Corrugated* Stainless Steel 1.4404 similar to AISI 316L (acc. to EN 10028-7).
Cleaned for use with gases having purity coefficient 6.0 (99,9999% pure gases)

Braiding: Stainless Steel 1.4301 similar to AISI 304

Hose connections: Stainless Steel 1.4404 and 1.4541
(acc. to EN 10216-5 CFA D4/T4 (DIN 17458 D4/T4))

Leak rate: < 10⁻⁹ mbar x l/s [He]

Surface roughness of the raw material: Ra max - 1.5 µm, Ra - 0.12 µm

Inside diameter: 8.3 mm

Outside diameter: 13.7 mm

Max. working pressure: 21 bar

Max. working temperature: 50°C

Bending radius (inner): ≥ 32 mm

Min. length with connections: 350mm

Packaging: individually packed in sealed bags

** Corrugated hoses have a large inner surface with media contact, therefore extended flushing may be required before taking into use! BROEN-LAB recommends purging by pressurizing a system by 10 bar to be repeated for 5-7 times.*

For further information please contact your local BROEN-LAB representative.

EXAMPLE OF HOSE CONFIGURATION

1200mm hose with male 1/4" NPT inlet connection and OD 10mm pipe outlet connection

BROEN-LAB CLEANLINE 6.0 FITTINGS

25 0X X X X 10 XX - XX

Material

3 - brass
4 - Stainless Steel

Mounting/inlet

0 - without installation kit
2 - surface mounted, female 1/4"NPT
4 - surface mounted, rear outlet, female 1/4"NPT
5 - panel/built-in, rear outlet, female 1/4"NPT
6 - panel/built-in, front outlet, female 1/4"NPT
7 - suspended, female 1/4"NPT
8 - bench mounted, OD6x1mm SS tube
9 - wall mounted (exposed), female 1/4"NPT

Flow valve

0 - none
1 - with
2 - angle (fitting with valve only)
3 - straight (fitting with valve only)

Outlet pressure

0 - no pressure regulator
1 - 1 bar
2 - 1.5 bar
3 - 2.5 bar
4 - 5 bar
5 - 10 bar
6 - 16 bar
7 - 25 bar
8 - 65 bar

Outlet connection type

blank - female 1/4"NPT
BA - brass, tube fitting OD 8mm
BB - brass, tube fitting OD 6mm
BC - brass, tube fitting OD 1/4"
BD - brass, tube fitting OD 1/8"
*BE - brass, female BROEN-LAB UniFlex™
BF - brass, flashback arrestor (C₂H₂ - 1.5 bar; H₂ - 3.5 bar)
SA - SS, tube fitting OD 8mm
SB - SS, tube fitting OD 6mm
SC - SS, tube fitting OD 1/4"
SD - SS, tube fitting OD 1/8"
SG - SS, tube fitting OD 10mm
SH - SS, hose nozzle ID 1/4"

BROEN-LAB develops, manufactures and sells Laboratory Fittings, Emergency Shower Systems and Eye Wash Systems into a broad spectrum of laboratories and industrial locations; sectors include Pharmaceutical, Food&Beverage and Academia. Our expertise and product quality ensure optimal solutions compliant to all relevant international norms setting new standards in risk mitigation in modern research and development facilities.

BROEN-LAB offer solutions that ensure the functionality, compliance, hygiene, durability and safety are of the highest priority. For over 50 years our products have been integrated into a wide variety of workplaces, laboratories, hospitals and industrial locations, with features that are assessed and designed to be flexible, durable and compliant offering a broad range of options tailored to each location. This inherent design integrity provides confidence in the solution adopted wherever in the world these are applied.

BROEN-LAB is a collaboration partner in the design and layout of your next laboratory and it's integrated safety

BROEN-LAB A/S ISO 9001 certification

In September 1991 BROEN-LAB A/S was certified according to ISO 9001 as one of the first Danish companies. The certification was carried out by Bureau Veritas, Denmark, for our Danish site in Assens. The quality management system of BROEN-LAB A/S now complies with detailed specifications laid down by the internationally acknowledged EN ISO 9001:2015. This certification will further contribute to reputation for quality and reliability of BROEN-LAB A/S.
