

Inspired architectural casings

www.pendock.co.uk

Insight

Since Pendock was formed in 1987, our name has become synonymous with high quality decorative casing solutions for a diverse array of interior and exterior applications.

Today, our range has expanded considerably to meet the changing needs of architects and the construction industry, to include several distinct product lines, ranging from column casings and building linings to washroom cubicles and services casing solutions.

All our products are backed by comprehensive design, installation, and support services, which includes site surveys, technical advice, and guidance, as well as literature and detailed product drawings, which are freely available as PDF or DWG.

Our technical and project management team regularly support architect and specifiers to ensure the Pendock solutions chosen are not only compliant with the relevant codes and regulations, but also perform their primary function practically, effectively, and aesthetically.

With our extensive product range, decades of experience and comprehensive range of technical and support services, Pendock is the casings and enclosure specialist.

PENDOCK

PENDOCK RADIUS

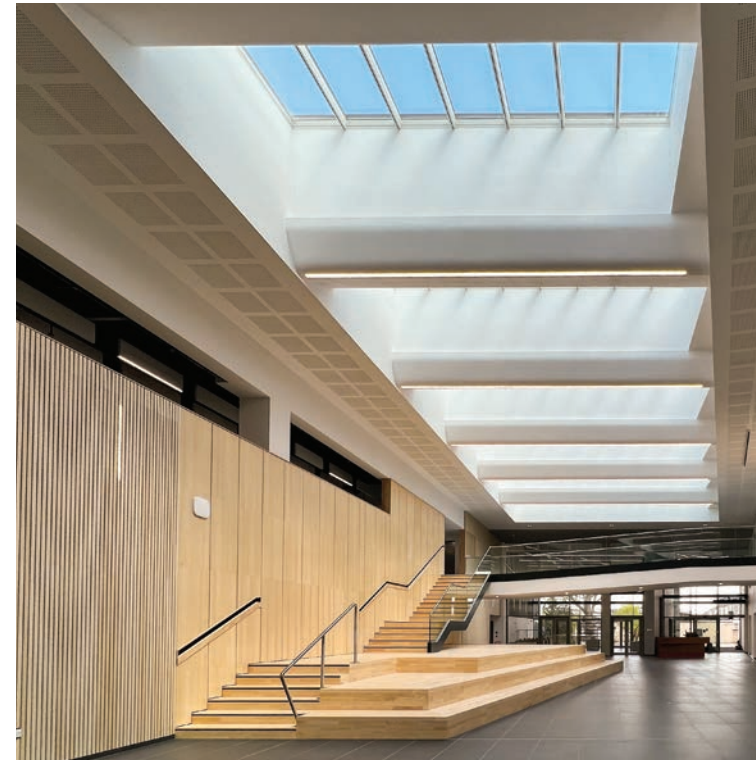

Bespoke column casings manufactured to individual project specifications and shapes, which are installed on a range of key UK projects.

Style & practicality

Designed to conceal interior and exterior structural steelwork or concrete columns, Pendock Radius includes six individual column casing types and includes both standard and bespoke casings manufactured from aluminium and stainless steel, as well as MDF.

PENDOCK LINEA

Decorative building lining solutions enable the perfect bespoke finish to be achieved for exterior and interior applications.

Form, fit & finish

Linea incorporates nine different types of building lining and architectural finishing products, from atrium beam casings, parapet capping and soffit linings, to interior pilasters, perimeter casings and ceiling rafts. This allows various lining elements to be specified from a single source, which simplifies the specification process.

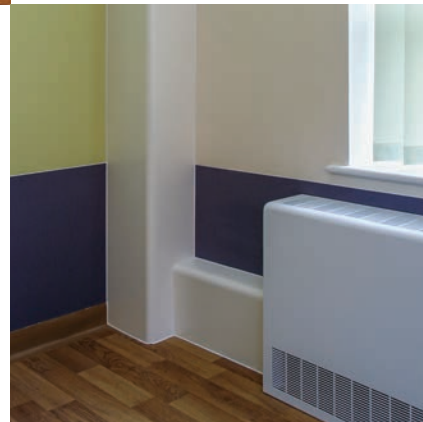

PENDOCK PROFILES

Pre-formed and pre-finished pipe boxing easily creates a high quality finish when concealing heating pipework and other building services.

Simple & effective

An extensive range of pipe boxing and casing solutions for concealing interior and exterior pipework for heating systems, utilities, and fire sprinklers, plus PIV schemes. The range includes pre-formed plywood options, for interior use, and metal pipe boxing for exterior applications, where durability or weather resistance is required.

PENDOCK WASHROOM

A diverse range of materials and finishes is available including MFC, HPL and compact laminate, plus BioCarbon® zero carbon laminates.

Versatile & hygienic

Pendock Washroom is a comprehensive range of cubicle and washroom solutions that cover requirements from single or multi-cubicle installations and IPS duct panel systems to solid surface wash troughs & vanity products, as well as DDA compliant options.
